Municipal Alliances (MAPSA) are local planning and coordinating bodies established in all 21 counties to assess needs, set priorities, develop plans and implement programs that form the foundation of New Jersey's substance abuse prevention activities. New Jersey's Municipal Alliances provide over 3,800 prevention programs statewide!

MAPSA, a community based volunteer organization, is organized under the local governing body to provide education and awareness programs to address substance abuse and related issues. Funding comes from DEDR funds, which are fines collected by a drug related offense.

The members are appointed from a broad cross section of stakeholders in the community. Members include representatives from the governing body, education, health, law enforcement, civic, religious, parents, youth, community members and business organizations.
